## Davisware, Inc. partners with Sales Tax Automation provider

**WEST DUNDEE, IL (December 18, 2015)** – Davisware has joined forces with the sales tax automation software market leader, [Avalara](http://Avalara.com). Effective Q1 2016, Davisware's GlobalEdge (GE) software solution will offer a fully-integrated interface with Avalara's cloud-based platform; providing an 'end- to-end suite of sales and other transactional tax compliance solutions.'

This integration will not only enable companies of all sizes the luxury to outsource and automate the sales tax process, it will also increase the speed and efficiency of transaction processing, as well as reduce the potential margin of error and overall compliance costs associated with the process.

Davisware is excited to be a certified partner with such a revolutionary software company and is confident this integration and partnership will be a significant value add to our catalog of solutions.

For more information, please contact your GE Product Representative or email [info@davisware.com](mailto:info@davisware.com). You may also visit [www.avalara.com](http://www.avalara.com).

###

### About Davisware, Inc.

*Davisware, Inc. was founded in 1988 by Dan and Jennifer Davis. Since inception, Davisware has employed a service-first approach and upheld its mission to offer comprehensive, all-inclusive technology products serving our users' unique business needs. By closely working with our U.S. and Canada customers, as well as partnering with the best technology providers, we offer technology solutions critical to the growth and success of your business.*

*Davisware's premier product lines, including GlobalEdge (GE), S2K Vision, Global Field Solution (GFS), Global One Fleet (GOF), E2 and Global Warranty (GW), in conjunction with a dedicated customer service team, intuitive ability to continually update our technology systems and a strong commitment to excellence, give us and our users the competitive advantage in the marketplace.*
