Davisware's Global One Fleet gets web-based upgrade

WEST DUNDEE, IL (July 29, 2016) – Davisware is pleased to announce the debut of a web-based version (<https://gofweb.davisware.com> – previous login credentials still apply) for its Global One Fleet (GOF) software solution. This new platform eliminates the need for software installation, allowing users remote access capability.

In addition to a remote interface, the product upgrade boasts the following features:

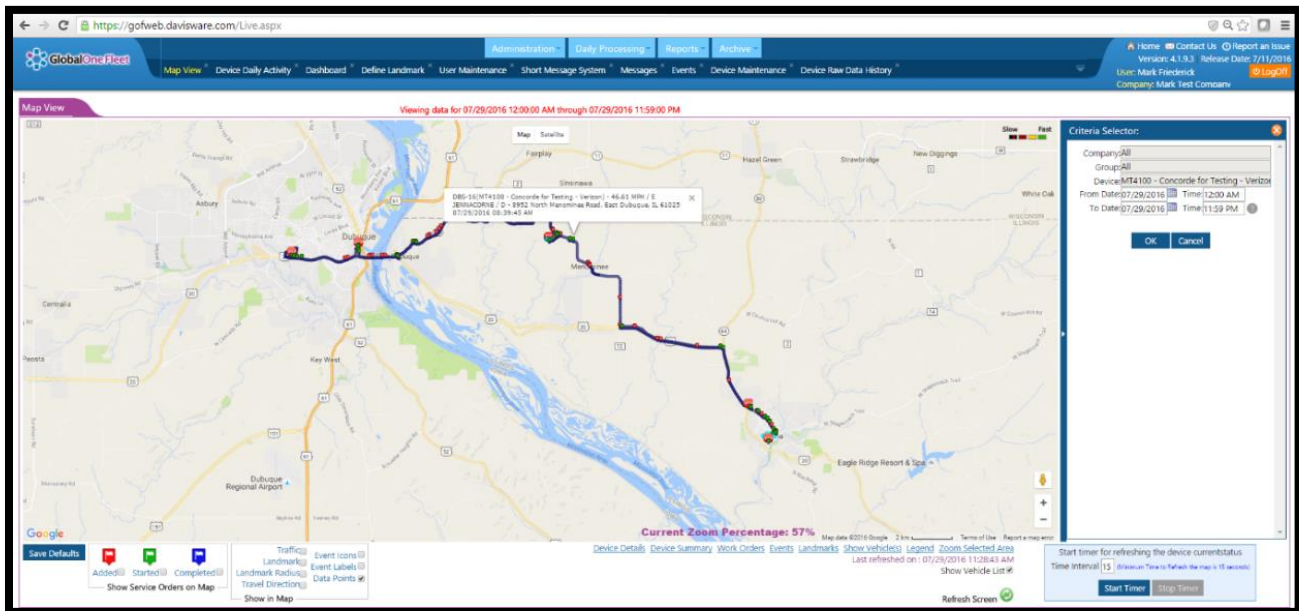

- New and improved menu/module navigation
- Redesigned Dashboard:

514 Market Loop, Suite 111, West Dundee, IL 60118
847.426.6000

Davisware.com | facebook.com/DaviswareInc | [@DaviswareSS](https://twitter.com/DaviswareSS)

- Redesigned MapView:

- Vehicle setting customization
- The ability to view Service Orders on a map
- New and improved Events and Notifications
- Improved accuracy and location with Google Maps
- Improved vehicle Data Reports

###

About Davisware, Inc.

Davisware, Inc. was founded in 1988 by Dan and Jennifer Davis. Since inception, Davisware has employed a service-first approach and upheld its mission to offer comprehensive, all-inclusive technology products serving our users' unique business needs. By closely working with our U.S. and Canada customers, as well as partnering with the best technology providers, we offer technology solutions critical to the growth and success of your business.

Davisware's premier product lines, including GlobalEdge (GE), S2K Vision, Global Field Solution (GFS), Global One Fleet (GOF), E2 and Global Warranty (GW), in conjunction with a dedicated customer service team, intuitive ability to continually update our technology systems and a strong commitment to excellence, give us and our users the competitive advantage in the marketplace.
